

Hannah Lyn T. Santiago

Computer Engineer · Embedded Systems · Software · QA

I build it, wire it, and break it before users do.

Cebu City, Philippines · santiagohannahlyn1126@gmail.com · hannahlyn.santiago.22@usjr.edu.ph

SUMMARY

Computer Engineer trained at University of San Jose–Recoletos. I work across the full stack, from microcontrollers and PCBs to web, desktop and mobile apps, with a QA mindset that catches issues early.

EXPERIENCE

READS Working Scholar
2022 – 2026

Office of the Registrar · University of San Jose–Recoletos

- Front desk: served students, alumni and walk-in clients, and explained registrar procedures and requirements
- Assessed requests for transcripts, certifications and other school documents before processing
- Troubleshot office computers, printers and software; managed and validated digital records

Public Information Officer
2024 – 2025

Computer Engineering Society

- Managed public communications for the Computer Engineering Society

Immersion Program Facilitator

Senior High Immersion Program

- Taught Senior High students C programming and digital logic design

EDUCATION & HONORS

BS Computer Engineering
University of San Jose–Recoletos · Cebu City
READS Working Scholar · 2022 – 2026

Senior High School
With High Honors
Academic Scholar

SKILLS

Languages
C · C++ · C# · TypeScript · JavaScript · Python · MicroPython · Embedded C · VHDL · SQL

Frameworks & Web
React · Next.js · .NET / .NET MAUI · PHP · HTML5 · CSS3 · XAML

Databases
MySQL · MongoDB · phpMyAdmin

Hardware & IoT
ESP32 · PIC16F877A · Arduino · Adafruit IO · Google Assistant · FPGA · PCB Design

Mobile & Platforms
Android · Windows

Tools
Git · GitHub · VS Code · Visual Studio · MPLAB · Arduino IDE · MATLAB · XAMPP · Microsoft Word · Microsoft Excel

QA
Functional Testing · System Testing · Defect Reporting · Validation

Soft Skills
Client Communication · Time Management · Attention to Detail · Research & Analysis · Problem Solving · Teamwork · Leadership · Teaching & Mentoring · Public Communication · Adaptability · Multitasking · Critical Thinking

PROJECTS

Xeleqt Inventory Monitoring System
Delivered one traceable system that connects Finance, Hardware and Admin, from purchase order to finished-product delivery.

React · TypeScript · PHP · MySQL · XAMPP · Vite · Tailwind CSS · Electron

Online Internship Placement & Monitoring System
Moved the whole OJT lifecycle online for USJ-R Computer Engineering, from placement to logbooks to completion certificates.

React · TypeScript · PHP · MySQL · Vite · Tailwind CSS · jsPDF · Vercel

Cebu Jeepney Commuters' Guide
Shows Cebu commuters the right jeepney route and the fare before they ride.

.NET / .NET MAUI · C# · XAML · Android · Visual Studio · MVVM · OpenStreetMap · JSON data

Industrial Trade Jobs App
Connects skilled trade workers and clients, from job post to payment, in one app.

.NET / .NET MAUI · C# · XAML · Android · MVVM · Figma

Smart Home City
A voice-controlled smart city model that reacts to motion, light and commands in real time.

ESP32 · MicroPython · Adafruit IO · Google Assistant · PIR sensors · OLED

Ball Color Sorting Robot
A line-following robot that detects and sorts red, green and blue balls on its own.

PIC16F877A · MPLAB · Embedded C · RGB sensing · L298N motor driver · 18650 Li-ion pack · 4WD chassis

Sumobot & Line-Follower Robots
Competition robots that sense, decide and react in real time.

Embedded C · Sensors · Actuators

FPGA Designs
Hardware-level logic, from LED systems to a working digital alarm clock.

VHDL · FPGA

PCB Design
Custom circuit boards, including a playable piano circuit.

PCB Design
